Each student has to refer to his supervising T.A. or demonstrator as soon as possible this week to start work and finish collection of questionnaire data and deliver the hard& soft copy of questionnaire by week 10.

Any student participating in another department project like phytochemistry project has to refer to T.A. Mohamed Salah at C524.

Thesis deliver is by week 12 and discussion by the supervising staff member is by week 13.

You have to know that if there is any source of cheating or fabrication in the data you are collecting, you will lose 10 marks out of 20.

Good luck.
