Pharmacology II PHR 481

**Week 10 practical sessions important announcement**

- Kindly note that we will have explanation first at our labs (C518 AND C520), followed by using the simulation program in the computer lab according to the previously announced distribution.

All Students should bring their lab notes and lab coats

All students should attend in their assigned group.

- Also as a reminder, we will have a chart for the effect of autonomic drugs on the isolated toad’s heart to be fully labelled, and also you will have one or two questions regarding the effect, mechanisms or receptors upon which drugs acted to produce their effects.

**Each student will have a chart to solve on his own, no notes are allowed.**

These charts and questions will be graded out of 5 marks, so please be prepared.

*Good Luck*
