Pharmacology II PHR 481

Week 11 Practical announcements

We are going to have our week 11 practical sections according to the previously mention distribution.

You are required to bring a pencil and an eraser as you will be asked to **draw** the scheme for an unknown depressant drug (Dil. Nicotine, Acetylcholine or Ethanol).

The scheme should **be fully labelled with the drugs’ name, doses and unit**.

Also **drugs should be added in the proper sequence**.

This section will be graded out of 5 marks

So **study the scheme as you are not allowed to use your lab notes**.
