For 1 year	Chief of Artistry committee – Alexandria University
2002	Chief Manager of Alexandria Creativity Institute
2012	Dean of Faculty of Dentistry – Pharos University in Alexandria

### **Recent relevant Publications/Patents:**

- Scanning electron microscope study on remineralization of enamel using dicalcium phosphate dip hydrate as calcifying saluting
- The cutting deficiency and life span of recently developed carbide ergonomy
- Study of the effect of different analgesic drugs on pulp sensitivity
- Evaluation of bond strength between different non-precious ceramo-metal alloys and porcelin

- Effect of different polishing materials on the surface texture of new type of composite
- Role of dentinal apical plug in improving apical sealability
- Evaluation of new type of composite materials as facing bridge work
- Comparative histopathological study of four root canal sealers on the periapical tissues of dogs.
- Effect of posterior composite on strengthening of tooth structure
- Surface texture of composite resin after extrinsic removed SEM
- Effect of different cavo-surface margins on microleakage of posterior composite
- Sealing ability of tunnel preparation restoration
- Effect of dentinal smear layer on the bond strength of different restoration
- Effect of age and sex on the alkalinity of gingival crevicular fluid as a factor in self-cleansing mechanism
- Comparison between microleakage around porcelain and composite inlay.
- Study of Fit, microleakage, and shear bond strength of CAD/CAM fabricated porcelain laminate

### **Supervised Researches:**

- Pulp capping with glass-ionomer cement in human teeth
- Human pulp capping with isotuyl cyanoarylate
- Study of correlation between different restorative materials, Ph of saliva and gingival crevicular fluid
- Comparative study between the relation and seating of full veneer crowns using 2 finish lines
- The effect of dialone, exposure time and thickness on the hardness of three types of visible light composites
- Effect of finishing on ocular of different types of composite
- A comparative study of the rear reston of different posterior composites
- A scanning electron microscopic study of dentin surface often treatment in the different materials for the removal of smear layer
- A comparative study of the effect of investment materials on the marginal fit of Wiron 88
- Evaluation of the effect of different desensitizers of hypersensitive root surface
- Study of the bond strength of composite to metal surfaces using a new dental adhesive
- Comparative study of the effect of different types of resin luting cements on the marginal adaption of composite inlay
- Study of antibacterial effect, microleakage, and bond strength of new antimicrobial adhesive system in comparison to chlohexidine cavity disinfection

- Comparative study of tooth color change, hypersensitivity and calcium loss following the use of two different bleaching systems
- Study marginal adaptation, microleakage and shear bond strength of two recent adhesive resin system
- Effect of different remineralizing agents on early carious lesions in children
- A comparative study on different types of dentin adhesive
- Direct pulp capping with different dentinal adhesive resin system; clinical and histological study
- Clinical histological and laboratory study of the efficacy and safety of different light and chemically activated in-office bleaching systems

### ***Conferences, Workshops, and Extracurricular activity:***

15 years – present time

Corporate at establishment of the concept of international dental congress
