## Faculty of Dentistry

### Faculty of Dentistry, University of Pharos

#### Advantages of the Faculty of Dentistry - Pharos University

1. The buildings, facilities and equipment of the faculty are suitable for the nature of its activity and the number of its students according to the general specifications of buildings, facilities, classrooms and laboratories (NORMS) and the availability of a plan for periodic maintenance.
2. Providing excellent service in VIP clinics and postgraduate advanced clinics for dental implants which are equipped with the latest technologies such as CAD / CAM machine, electron microscope unit, general anesthesia unit, and the availability of different types of X- rays (normal, digital, panorama, cross section) as well as the outpatient clinics providing economic treatment.
3. Bachelor's degree students offer free integrated treatment (CCC) as a community service to help them develop their skills in diagnosis and treatment, as well as the various research projects which they are obligated to as graduation requirements.
4. The faculty clinics are provided with a unique computerized information system that facilitates the easy way of saving and transferring of patients' information/data.
5. The faculty offers its students specialized laboratories for pre-clinical training.
6. The faculty offers a postgraduate program specialized in prosthodontics and dental implantology.
7. There are multiple policies for the students support as well as the availability of university dorms/ residence halls within the university campus.

8. An approved job description for all the job careers within the faculty is available and announced. Furthermore, there is a supported system of performance evaluation and follow-up at the University of Pharos.
9. The faculty supports researchers and motivates them for scientific publishing as well as holding protocols of understanding with a number of foreign universities and local authorities for student, scientific and academic exchanges. The faculty also seeks for a gradual and continuous increase in the number of its annually applied students (either Egyptians or foreigners).
