## Cerebral Palsy

### A Continuous Misery and Great Struggle

#### Participated Students:

Maram Maged Othman

Hana Essam Habashy

Shaaban Ahmed Shaaban

Mathew Jacob Rizkallah

Youssef Hesham Elazab

#### Under Supervision of:

Dr. Muhammad Al Bagoury, Lecturer of Pediatric Physical Therapy

#### Project summary:

Cerebral palsy is a major problem with affection of movement in children with a group of non-estimated associated problems affecting all other systems of the body. This project was conducted to estimate the percentage of those associated problems in cerebral palsy children.

#### Project Phases:

- Detecting all associated problems of cerebral palsy
- Forming the research team
- Formulating the questionnaire
- Specifying the targeted population
- Sharing the questionnaire

- Collecting the responses
- Analyzing the data
- Writing the summary

 **Project Aim:**

It was designed to explore the presence of associated problems in cerebral palsy children and the causes underlying these problems.
